BBQ Pellet Grills Lighter

GREENWAY CO.Ltd is a professional manufacturer of **BBQ Pellet Grills Lighter** that are widely used in pellet stove, pellet burner, biomass boilers with the advantages of long service time, fast heating rate, energy-efficient and eco-friendly. This hot surface MCH Ceramic Heater lighter is very good solution for BBQ grills.

They are simply the best for lighting wood pellet and barbecue Grill.

Our **BBQ Pellet Grills Lighter** use only a fraction of the energy required by hot air fans and ignition blowers and will light all fuel types. Ideal for wood pellets, wood chips, lot, corn, maize, etc. With a considerably higher temperature, around twice that of traditional metal sheathed products, ignition times are reduced to as little as 90 seconds. This makes them significantly more economical in use.

A fraction of the energy consumption compared to conventional air-heaters

Universal Model Dimensions: l = 94mm, d = 10.5mm and Others
